

ARTWORK REQUIREMENTS

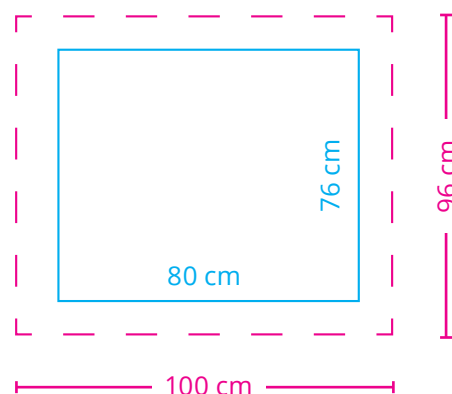

- Provide colors in CMYK color mode. Special Effects International Ltd. cannot take responsibility for any unexpected color deviations resulting from artworks provided in non-CMYK color mode. For spot color specifications please provide exact Pantone/PMS codes.
- **Convert all fonts used in the artwork into curves/outlines before exporting the vector file for printing.** Should this be not possible, please provide the exact font type used.
- **In case of vector graphic please make sure that none of the objects have overprint settings.** If these kind of setting occur Special Effects International cannot take responsibility for faulty printing results.
- Size of emailed artworks must stay below 16 MB, above this size please send artworks via large file transfer sites (e.g. [WeTransfer](#)).

Backlight Desk

- Required scale is 1:1 (100% of actual size).
- Visible size (w x h): 80 x 76 cm
- Save your artwork in any of the following formats: PDF, EPS or TIFF. All files are only accepted if links are embedded into the document.
- For spot color specifications please provide exact Pantone/PMS codes.
- Non-vector based artworks should be supplied at a minimum of 100 dpi resolution.
- **Do not include crop marks.**
- Leave a minimum of 25 cm bleed* on all sides of your document. (*Bleed is a printing term which refers to the extra graphic content that extends beyond the edges of the final document.) We need this much extra space for installation purposes.

Artwork size with 25 cm bleed:

1000 x 96 cm

To make sure your artwork is printed correctly and in time, please ensure you follow the requirements above. Artworks submitted with different specifications may be subject to extra amendment charges. Special Effects International Ltd. cannot take responsibility for print errors or late deliveries resulting from insufficient or delayed artworks.

If you need any further information or help to qualify your artwork specifications, please feel free to contact us.
